Education

University of South Carolina – Columbia

2024 - 2026

Master of Science – Marine Science, Satellite and Physical Oceanography

Cumulative GPA: 3.56

University of California – Los Angeles

2021 - 2023

Bachelor of Science – Atmospheric and Oceanic Sciences

Cumulative GPA: 3.56

Los Angeles Valley College

2017 - 2021

Associate of Science – Mathematics and Physical Sciences

Degree Honors – Magna Cum Laude

Cumulative GPA: 3.84

Awards and Honors:

Best Graduate Poster (DISCOVER USC 2025), Outstanding Research in Marine Science (Spring 2025), Chi Epsilon Pi Honor Society, Phi Theta Kappa Honor Society, Transfer Alliance/Honors Program, President's Distinguished Honor Award (Fall 2020 & Spring 2021), Dean's Honor List (6 Semesters and 2 Quarters)

Skills

Programming

- Python (Pandas, Matplotlib, NumPy, ArcPy, and TensorFlow), MATLAB (NetCDF and CSV Wrangling, Data Visualizations, Mathematical Modeling, HPC and Bash Scripting)

Software

- ArcGIS Pro, QGIS, JupyterLab/Notebook, Cryocloud, Zotero, Zenodo, Microsoft 365, Panoply, Google Earth Engine, and GitHub

Analysis

- High Resolution Spatial Modeling (HYCOM, CESM2), Statistical Analysis, in-situ field sampling and Manuscript Preparation

Leadership

- Project lead on group research projects, supervision of small teams, teaching and mentoring as an Instructor's Assistant, and graduate science mentor

Research Experience

Graduate Research Assistant

May 2024 – August 2025

University of South Carolina – Columbia

Analyzing mesoscale and submesoscale dynamics in the Gulf of Mexico through remote sensing and model simulations.

Undergraduate Researcher

Sept. 2022 – Dec. 2022

University of California – Los Angeles

Studied the Atlantic Meridional Overturning Circulation in a preindustrial model simulation where greenhouse gas emissions were held at a constant level.

Undergraduate Research Assistant (Internship)

June 2022 - August 2022

University of Wisconsin – Madison

Used the Community Earth System Model 2 to examine the relationship between oceanic Cold Anomalies and Atmospheric Warming Holes in the Atlantic Ocean.

Teaching Experience

Graduate Science Mentor

May 2026 – July 2026

NASA's Student Airborne Research Program (SARP)

Provide research guidance to new undergraduate researchers, with a focus on ocean remote sensing. Support and organize group collaboration, culture, and summer activities.

Graduate Instructor's Assistant

August 2025 – June 2026

University of South Carolina – Columbia

Led two laboratory sections per semester for Marine Science 101/210, instructing approximately 75 students across marine and earth science majors/non-majors.

Publications

Lee, P., Hiron, L., Gopalakrishnan, G., & Subrahmanyam, B. (2026). Biophysical drivers of surface chlorophyll-a in the Loop Current and Frontal Eddies in the Gulf of Mexico. *Journal of Geophysical Research: Oceans*, 131, e2025JC023797. <https://doi.org/10.1029/2025JC023797>

Lee, P. J., Brokaw, R. J., Nyadjro, E. S., & Subrahmanyam, B. (2025). Surface Salinity Variability in the Gulf of Mexico During Flood and Drought Years. *Geophysical Research Letters*, 52(8), e2024GL114409. <https://doi.org/10.1029/2024GL114409>

Conferences and Presentations

Lee, P. J., Hiron, L., Gopalakrishnan, G., & Subrahmanyam, B. (2025). Loop Current Frontal Eddies (LCFEs) and their Influence on Chlorophyll-a in the Gulf of Mexico. *AGU Annual Meeting*. 16 Dec 2025. New Orleans, LA
(Poster Presentation. Presenting Author: Pamela Lee)

Lee, P. J., Brokaw, R. J., Nyadjro, E. S., & Subrahmanyam, B. (2025). Surface Salinity Variability in the Gulf of Mexico during Flood and Drought Years. *National Academies – Gulf Research Program: Understanding Gulf Ocean Systems (UGOS) Grants Seminar Series*. 19 May 2025. Virtual
(Invited Presentation. Presenting Author: Pamela Lee)

Lee, P. J., Brokaw, R. J., Nyadjro, E. S., & Subrahmanyam, B. (2025). Surface Salinity Variability in the Gulf of Mexico During Flood and Drought Years. *Discover USC*. 25 April 2025. Columbia, SC
(Poster Presentation. Presenting Author: Pamela Lee)

Pamela Lee and Subrahmanyam Bulusu. Salinity Variability and Loop Current Positioning Observed in the Gulf of Mexico during Flood and Drought Years. *School of the Earth, Ocean and Environment's Grad Day*. 4 February 2025. Columbia, SC
(Oral Presentation. Presenting Author: Pamela Lee)

Relevant Coursework

Graduate

- Chemical Oceanography, Paleoclimatology, Biological Oceanography, Air-Sea Interactions, Physical Oceanography, Satellite Oceanography, Remote Sensing using ArcGIS, Python based Artificial Intelligence

Undergraduate

- Climate Modeling, Fundamentals of Air and Water Pollution, Dynamics of Oceans and Atmospheres, Atmospheric Thermodynamics, Tropical Climatology, Introduction to Python Based Research in Atmospheric and Oceanic Sciences, Advanced Dynamic and Synoptic Meteorology, Atmospheric Boundary Layer Dynamics, Ocean Change in the Anthropocene, Research Methods of California's Ocean
